Chapter 1

Hierarchical Index

1.1 Class Hierarchy

This inheritance list is sorted roughly, but not completely, alphabetically:

TestCase	
dbDoxygen.Test_SQL_DB	5

Chapter 2

Class Index

2.1 Class List

Here are the classes, structs, unions and interfaces with brief descriptions:

dbDoxygen.Test_SQL_DB	
Test class for testing database	5

Chapter 3

Class Documentation

3.1 dbDoxygen.Test_SQL_DB Class Reference

Test class for testing database.

Inheritance diagram for dbDoxygen.Test_SQL_DB:

Public Member Functions

- def [TestGetNameUsingBeerID](#)
Confirms that beer category ID's are linked to proper beer category names in BeerCat table.
- def [TestGetColorUsingColorID](#)
Confirms that beer color ID's are linked to the proper beer color in Color table.
- def [TestGetFoodUsingFoodID](#)
Confirms that food ID's are linked to proper food name in Food table.
- def [TestGetBeerNameUsingFoodId](#)
Confirms that food ID's are linked to proper beer matches in the FoodPairing table.
- def [TestGetReviewUsingFoodIdAndBeer](#)
Confirms that the correct review is linked to proper FoodID and beer Name in the FoodPairing table.

3.1.1 Detailed Description

Test class for testing database.

This class tests that SELECT statements return desired results.

Authors

Jacob C. Levine, Spencer Wilson, Matt Geckle

Parameters

<i>unittest.TestCase</i>	The Test Case pointer.
--------------------------	------------------------

3.1.2 Member Function Documentation

3.1.2.1 `def dbDoxygen.Test_SQL_DB.TestGetBeerNameUsingFoodId (self)`

Confirms that food ID's are linked to proper beer matches in the FoodPairing table.

Test format: SELECT Name FROM FoodPairing WHERE FoodPairing.FoodId = <ID number>=""> Returns false if a self.assert fails

Parameters

<i>self</i>	The object pointer.
-------------	---------------------

3.1.2.2 `def dbDoxygen.Test_SQL_DB.TestGetColorUsingColorID (self)`

Confirms that beer color ID's are linked to the proper beer color in Color table.

Test format: SELECT Name FROM Color Where Color.Id = <ID number>=""> Returns false if a self.assert fails

Parameters

<i>self</i>	The object pointer.
-------------	---------------------

3.1.2.3 `def dbDoxygen.Test_SQL_DB.TestGetFoodUsingFoodID (self)`

Confirms that food ID's are linked to proper food name in Food table.

Test format: SELECT Name FROM Food Where Food.Id = <ID number>=""> Returns false if a self.assert fails

Parameters

<i>self</i>	The object pointer.
-------------	---------------------

3.1.2.4 `def dbDoxygen.Test_SQL_DB.TestGetNameUsingBeerID (self)`

Confirms that beer category ID's are linked to proper beer category names in BeerCat table.

Test format: SELECT Name FROM BeerCat Where BeerCat.Id = <ID number>=""> Returns false if a self.assert fails

Parameters

<i>self</i>	The object pointer
-------------	--------------------

3.1.2.5 `def dbDoxygen.Test_SQL_DB.TestGetReviewUsingFoodIdAndBeer (self)`

Confirms that the correct review is linked to proper FoodID and beer Name in the FoodPairing table.

Test format: SELECT Name FROM FoodPairing WHERE FoodPairing.FoodId = <ID number>=""> Returns false if a self.assert fails

Parameters

<i>self</i>	The object pointer.
-------------	---------------------

The documentation for this class was generated from the following file:

- dbDoxygen.py
